

CRYSTAL SPRING Wet/Dry FEEDERS

SAVE WATER and Money

The
"GRO MASTER
ADVANTAGE"

TECHNOLOGY
and
SERVICE
after the
SALE

In test after test the Crystal Spring Feeding System out performs other feeders in on farm and university research. Not only will you see increased growth, increased savings on feed but water savings.

Water is not only a precious nutrient but a precious commodity in the environment. The more water wasted the more water in the pit which increases the amount of waste that needs to be removed.

Crystal Spring Wet/Dry Feeders:

- Save almost a GALLON of water per day PER PIG!
- Friendly to the Environment and the Wallet
- Decrease the labor and time spent pumping pits and hauling manure
- Decrease fuel energy in manure spreading
- Improve the manure nutrient concentration
- Increase your fertilizer value

EACH Crystal Spring Feeder will SAVE money vs. other watering systems

Type of Waterers	Savings %	Estimated Wasted Water Gallons/Pig/Day	Cost per Turn Per Pig	2 Space Double Sided Feeder 60 Pigs/Feeder	2.5 Turns Per Year
Fence Line Nipples	35 - 45	0.85	\$1.02	\$61.20	\$153
Swinging Nipples	25 - 35	0.50	\$0.60	\$36.00	\$90
Water Cups	10 - 15	0.20	\$0.24	\$14.40	\$36

Cost based upon one cent/gallon to spread wasted water. Assume 120 days feeding/pig.
